

SIS-SME

Using Eduzines – interactive, transmedial learning materials for smartphones – to build strategic innovation skills of SMEs

HOPE ON TO THE SIS SME BUS – AND LET’S TAKE A RIDE!

What the busy ones we had since our last update!

To start with, the partners had the pleasure of meeting each other twice and have done a lot of work during these events.

May 2022 was hot. We participated in a Learning Teaching Training Activity in Ruse, Bulgaria. During the LTTA, we were able to enrich theoretical knowledge and to test the first part of the In-Service Training Programme Manual. It was a great opportunity for the VET tutors to share their knowledge and experience in the sphere of innovation.

Apart from the work, we also learned and enjoyed Bulgarian culture.

In addition, we have fine-tuned some details with two Intellectual Outputs, finalised the translation.

**STAY
INNOVATIVE
WITH US!**

Thanks to our agenda, we were not waiting too long to meet each other again...

Thus, participants worked in groups, applying gained knowledge to the practice, improving digital skills and... overcoming very funny challenges.

Developing own business ideas, working on mission, vision and values establishing, marketing ideas, promotions, innovating entrepreneurship, collaboration within the international context, video making, this and much more happened in Vigo.

In other obstacles we would say: 'What happened in Vigo, stays in Vigo!' But not this time. So, check out that have turned out of there by scanning the QR code.
